1 Software Installation

1.1 Overview

This software is a powerful Central Control Software. The system is distributed framework with more windows, multiple previews, video recording, local and remote review, log query, alarm playback and remote configuration. The user interface is friendly; operation is simple and it is convenient to conduct authority settings.

The software can applied on the connection of different type or model devices (For example, NVR, IPCAM etc.). This manual focuses on the software operation and takes NVR’s connection as the example. As for the specific device’s function setting, please check the relative instruction. This manual is for the person who is in charge of plan, execution or review the monitor, and the hardware installation. So the person should be equiped with basic operation knowledge and experience of the relative devices (such as NVR, IPCAM etc.)

1.2 Software Installation

Find out and double click the file "CMS5.1.27.2.exe", and then the dialog pops up as below.

(1) choose the system language you need, click "Next", the dialog appears as below.
(2) Input the user information, click "Next", the dialog appears as below.

(3) Click "Browse", select the install location, the default location is "C:\Program Files\HeroSpeedCMS", click "Next", see the below picture.
(4) Click "Next", start to install CMS, the dialog appears as below.

(5) Choose the type, click "Next", the dialog appears as below.
(6) Click "Install" to start installing. The progress bar as below.

(7) After finish, it will remind you "Initialization completed", then the appears on the desktop.

(8) Click "Next" , then the appears on the desktop again .
(9) Click "Next", the dialog appears as below.

![Welcome to the Dvr_WebOcx_P Setup Wizard dialog](image1)

(10) Click "Next", the dialog appears as below.

![Select Destination Location dialog](image2)
（11）Click "Browse", select the install location, the default location is "C:\Program Files(x86)\Dvr Webocx p", click "Next", see the below picture.

（12）Click "Browse", select the Start Menu install location, the default location is "Dvr Webocx p", click "Next", see the below picture.
(13) Click "Install" to start installing. The progress bar as below.

(14) Click "Finish" to finish the “Dvr Webocx p” installation.

(15) Click "Finish" to finish the Herospeed CMS installation.
2 Introduction To Basic Function

2.1 Login System

After finish the installation double click “” on the desktop. The log-in screen appears. In the first log-in, you should register a user, the user is the system administrator with all the authority. You should set the user name and password (such as, user name: admin, password: admin).

2.2 CMS Operating Interface

After finish the user name and password, click "OK", then enter the Operating Interface as below picture.
### 2.2.1 Operating Zone

During the visual preview, the user can do it in the operating zone. Click the right mouse button, you can conduct the configuration of system video play.

### 2.2.2 Menu

The user can choose to set single menu and its sub-menu in the MENU.

![Menu Diagram]

2.2.6 Message Prompt Box

The massage prompt is as the below picture. During the configuration and operation, the system will record operating information automatically and prompt with Message Prompt Box.

![Message Prompt Box](image)

Send video preview request:
NVR_192.168.1.91_554(
192.168.1.91_554)
3 Configuration Management

3.1 Device Management

Before the software operation, you should add the device and make the configuration. Click the Log Query on "Tool" of menu, then the device management interface comes out as below picture:

**3.1.1 Zone Add, Modify, Delete**

Right click on the junction point of zone, choose the "Add Zone" on the pop-up menu, then fill in the Zone Name, then click to finish the zone adding.

Note: right click the zone, "Delete Junction Point", "Modify Name" means to delete the junction point and modify the name.

**3.1.2 Manually Add**

Click the "Configuration Management" on the menu, open the window of "Device Management", choose the "Device List", then the sub-menu "Manual Add" of "Add New Video Device", as below picture:
First: Open Add Device window.
Second: Fill the Device Name, Type and IP information. After filling, click to confirm the add.
Third: After the add, go back to the main window, now you can double click the device channel to see the video.

- **Device Name**: Randomly fill, just as the device Identifier.
- **Device Type**: You can choose DVS、NVR、IPCAM etc.
- **Device IP**: IP address of the video server to be connected.
- **Channel Quantity**: The quantity of video server channels.

### 3.1.3 Online Device Detect

1. Click the "Configuration Management", open the window "Device Management", choose the "Device List" and right click, then sub-menu "Online Search" of "New Video Device", as the below picture:
2. After the Query, choose the device you need to add and select the number of the front box, then click the "choose device" to confirm.

![Device Management Interface]

### 3.1.4 Front-end Device Parameter Settings Management

Click the device name in the device management, as the below picture:

![Device Parameter Settings]

You can modify the parameters like Device Name, Port No., and User Name/Password etc. The default port No. is 554, and the default http port No. is 80.
Click the channel in the device management, as the below picture:

<table>
<thead>
<tr>
<th></th>
<th>Description</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Modify the channel name.</td>
<td>2</td>
</tr>
<tr>
<td>3</td>
<td>Channel data rate mode choice.</td>
<td>4</td>
</tr>
<tr>
<td>5</td>
<td>Mobile detect plan choice.</td>
<td>6</td>
</tr>
<tr>
<td>7</td>
<td>Link Type choice.</td>
<td>8</td>
</tr>
</tbody>
</table>
3.1.5 Remote Configuration

Open "Device Management", select any device from the device list on the left, then right click to select the menu of remote configuration. You can also click the remote config on the right.

DVR, for example, Choose the device of DVR, click "remote config ", then enter the Operating Interface as below picture.

Note: the related operations is the same as the web operations of DVR. As for the specific device's function setting, please check the relative instruction.
3.2 Schedule Configuration

Schedule is applied on the period of auto-record, you can choose the time to record by your own choice. The operation is like this:

First: Click the "Configuration Management", open the "Schedule Configuration" window

Second: Choose the time to record by your own will.

Third: Schedule Associated Camera.

A Batch of associated camera, choose, make the recording plan for the cameras.
Single camera associated schedule, open "device management", choose a video channel, and select the schedule to be set in "Auto-record" (If you chose the time regulation, the system will obey the regulation to record automatically).

**Note:** This option is effective for preview video channel.

### 3.3 Alarm Linkage Plan Configuration

Alarm Linkage offers many alarm prompt methods, the operation is as below:

**First:** Click the "Configuration Management" on the menu bar, open "Linkage Plan Configuration" to install the alarm linkage.
- **Plan Name:** Modify the plan’s name.
- **Sound to Play:** Set the alarm ring, the computer will sound. (rank: 5~1200s)
- **Record:** When it alarm, the camera will present red alarm and record. (rank: 5~3600s)
- **Pop Video:** After the configuration, trigger the alarm, alarm window will pop out.

**Second:** After finish, click the Modify to save the data.

**Third:** Video channel associated plan, open "device management", and choose a video channel, manage the plan according with the alarm mode.

**Forth:** Click Modify to save data, then PC will alarm according to the settings.

**Note:** This option is effective for preview video channel.

Users can choose to select the arming or disarming the alarm signal processing to front-end device, in the device list, right-click on the menu bar device node in the device tree, select "arm" to start monitoring the alarm device, if the device is in armed state, right-click the device node, click the "disarming" to cancel the alarm monitoring equipment. Right-click the zone nude and select "Zone Arm" or "Zone Disarm" for all devices can be operated under the zone. If the software has been carried out after arming alarm linkage set, when receiving an alarm signal, it will trigger the relevant linkage operation. Software restart, armed state will revert to the state before the shutdown.
3.4 Configuration Lead-in And Lead-out

3.4.1 Configuration Lead-in

Click "Configuration Management" on the menu bar; open the "Configuration Lead-in and Lead-out ", select "Data Lead-out" to lead-out the configuration file "SysConfig.conf" to the given content.

Note: "SysConfig.conf" cannot be modified, or the lead-in will fail.

3.4.2 Configuration Lead-out

Click "Configuration Management" on the menu bar; open the "Configuration Lead-in and Lead-out ", select "Data Lead-out" and choose "SysConfig.conf" file. If succeeded, the data will be effective in the next restart of the Client.

3.5 Group Management

The software supports polling group play and group play. Before the polling play, the device should be added and set well.

Click the Device Management; select the group management, as below picture:
The left side is the added device list, the right side group list, the four button’s function is as below:

<table>
<thead>
<tr>
<th>Button</th>
<th>Note</th>
</tr>
</thead>
<tbody>
<tr>
<td>==&gt;</td>
<td>Add the selected channel to one group.</td>
</tr>
<tr>
<td>&lt;=</td>
<td>Selected channel will be deleted from group. When you click a group name, click the button, and then the entire group will be emptied.</td>
</tr>
<tr>
<td>UP</td>
<td>The channel Moves up to one position in the group when the channel is at the top, the button is gray, and this function is unavailable.</td>
</tr>
<tr>
<td>Down</td>
<td>The channel Moves down to one position in the group, when the channel is at the bottom, the button is gray, and this function is unavailable.</td>
</tr>
</tbody>
</table>

The user Right-clicks group name in the pop-up menu, select "Edit Group", then dialog box pops up as follows.

![Modify group dialog box](image)

This is the explanation to the box:

<table>
<thead>
<tr>
<th>Option</th>
<th>Note</th>
</tr>
</thead>
<tbody>
<tr>
<td>Device Group</td>
<td>User defines group name.</td>
</tr>
<tr>
<td>Pause Time</td>
<td>Preview display time of the packet polling.</td>
</tr>
<tr>
<td>Division Quantity</td>
<td>Show the total number of the split-screen when group play, the number is generally consistent with the total number of channels.</td>
</tr>
<tr>
<td>Polling permission</td>
<td>Select this option allows the group to participate in the given polling packet, the group must supports polling play.</td>
</tr>
</tbody>
</table>

22
When you add a channel to a group, first need to click the group name to be added, then select the channel be added from the list of devices and then click [ ]

When you want to removed it from the channel group, first need to select the channel and then click [ ], or right-click the channel name, then select "Delete channel" to delete the channel from the pop-up menu.

**Skill:** When user need to delete all channels under a group, just click the group name and then click [ ], you can right-click the group name and then select "Delete Group" to empty a group in the pop-up menu.
4.1 Log Management

Enter the "Tools" of menu bar and click "Log Search" interface, set the period of the log to be queried, select the mode and sub-mode of the log, click search, then the log will come out, as below picture:

![Log Search Interface]

4.2 Remote Replay

Enter the "Tools" menu on menu bar and click "Remote Replay Back" on the pop-up interface, as shown in this screen, you can view the video stored in NVR device.
Introduction to the Remote Replay Interface:

<table>
<thead>
<tr>
<th>Zone</th>

</tr>
</tbody>
</table>

4.3 Version Information

Enter the "Tools" menu on menu bar and click "Remote Replay" on the pop-up interface, The Version Information of CMS software is seen in the below picture:
5.1 PTZ Setup

Click the "PTZ" menu on the menu bar, it will show us as below picture:

Introduction to the PTZ Control:

<table>
<thead>
<tr>
<th>NO.</th>
<th>Function</th>
<th>NO.</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>steering controls</td>
<td>2</td>
<td>Zoom</td>
</tr>
<tr>
<td>3</td>
<td>Focus</td>
<td>4</td>
<td>Iris</td>
</tr>
</tbody>
</table>

- Click or press on any " " button on the steering controls, you can change the direction of the PTZ camera.
- Click"+" or "-" button on the zoom menu, you can adjust the scenery near and far.
- Click"+" or "-" button on the Focus menu, you can adjust the sharpness of the picture.
- Click"+" or "-" button on the Iris menu, you can control through the lens of the light.
Click the device list of the main menu, it will show us the device list Currently.

6.1 Watching Video

6.1.1 Free View Model

- **Double-click the channel to play**: Select one Play Window of the Video-viewing area, the channel will play in the Play Window. Under the Spilt Screen Preview Model, it will be shown as full screen when we double-click any preview frame and it will be restored when double-click again. The currently channel can be stopped by clicking the “𝐗” on the top right corner.

- **Click the right key to play**: Select any play window of the video-viewing area, right key the channel of the device tree, and then select "Open to Preview", the channel will play in the play window.

- **Drag the channel to play**: Select any channel of the device tree then hold down the mouse and the channel will start playing when it is dragged to any play window in the view area.

- **Multichannel Preview**: Select the Picture-division LNK tool in the Picture-division and the Polling toolbar , the frame can be displayed in 1, 4, 8, 9, 13 and 16 channels.

- **Picture Zoom**: We can adjust the scaling of digital and number by clicking the button of zoom in and zoom out in preview window. The scaling can be adjusted by rolling the roller under the model of Number zooming out.
6.1.2 Right Menu

Select any play window in the video-viewing area, the user can do the following by right-clicking.

- **Stream Switching**: The main stream, stream 2 and stream 3 can be chosen to preview.
- **Picture zoom in**: Set the current channel as digital zoom in or number zoom in, the default is number zoom in.
- **Capture**: Capture the current time and the picture of the current channel, save it to the disk.
- **Start Recording**: Record the current channel and save it to the disk.
- **Stream**: Show the flow of the preview channel.
- **Color Set**: Make the color configuration of the current channel and the brightness, the contrast, the saturation and the sharpness.
- **Stop play**: Close the frame of all channel.
- **Show as original scale**: Zoom in pictures as the original scale.
- **Show the title bar of all windows**: Show the title bar of all windows.

6.1.3 Play In Groups

Click the "Device List", show the device in groups.
Right-click the menu to play: Select any play window of the view area. Then right-click any group of the device list to select "Play in groups". The group will start to play the channel of it in turn.

Drag the play group: Select a group in the group list, hold down the mouse button down, and drag it to view a play area in the window, the packet will change the playback window to start playing the packet channel in turn.
